

Sahayak · सहायक · Ideas for India 2026

An offline scam shield and benefits guide for people new to digital money, in Hindi and English, by voice or touch.

"Is this a scam?" Paste, speak, photograph or describe a message, a call or a UPI QR code. A verdict in milliseconds, the three reasons behind it, what to do next, and a ready-to-file 1930 complaint. A QR card always says: scanning sends money, it never brings money in.

"What am I owed?" A short spoken interview finds which of 12 central schemes (pensions, PMSBY, PMJJBY, APY, PM-KISAN, PM-JAY 70+, e-Shram, PM-SYM, Jan Dhan) a person can get, with the papers, the office, what to say at the counter, and a printed slip with a QR for the CSC operator.

HOW IT WORKS

- **One node at a CSC or bank-agent counter** (a laptop or mini-PC). Phones join its Wi-Fi, which has no internet; the app is a cached web page, no install.
- **At home, too:** after one visit the phone keeps its own scam check and benefits interview, with no node or internet; results lead with health cover (Ayushman; Vay Vandana for 70+).
- **Named signals decide, not a model:** 51 signals in a signed content pack (lookalike links, .bank.in rule, UPI "scan to receive", OTP asks, digital arrest...), a pattern matcher and a small classifier. Vetted templates explain each verdict; an optional local LLM may add a line only through a safety gate (off in the demo).
- **Scheme rules as data**, each traced to its official page and date; answers with yes / likely / unknown / no, asking only questions that can still change the result.
- **Offline voice** both ways on the node; amounts spoken as words; "I heard ..., is that right?" before any answer is used.
- **An operator console:** "Ask the agent" queue, assisted checks read aloud, consented encrypted case log, 58 mm slips, impact counters with no personal data.

MEASURED, NOT CLAIMED

Scams caught	91.9% (95% CI 82.1%–100.0%) vs 51.4% for a keyword blocklist; false alarms 8.7% vs 43.5%
Verdict time	2 ms median on a laptop CPU
Scheme rules	2,400 / 2,400 decisions match an independent re-derivation; median 5 questions, never more than 7
Hindi speech	15.4% word error on Google FLEURS Hindi (418 recordings); reply audio 0.65 s after the mic is released
Screenshots	same scam decision as the typed message on 51 / 55 rendered SMS screenshots, read offline
Red team	46 / 52 disguised scams flagged on the first run (blocklist 33 / 52); 52 / 52 after the fixes it found
Offline	0 outbound connections or outside DNS lookups by the node, counted live by an audit hook; firewall blocks the rest
On the phone	the node's exact answer on 1,453 scam checks and 7,983 benefits cases (0 mismatches)

यह ठगी है: 'पैसे पाने' के नाम पर UPI ठगी।

PRIVACY AND SAFETY

- Messages, voices and answers stay in the node's memory for at most 15 minutes; nothing typed or said is written to disk.
- Case log only with consent, no names or numbers, encrypted, deleted after 30 days; one "delete everything" button. Counters hold counts only.
- Green means "no signs found, still verify", never "safe". Every amount shown comes from a signed pack. Content updates are Ed25519-signed; an altered pack is refused.

Team: Roshan Raj, Ishmiit Singh · **Caveats:** ScamBench v0 was written by our team (optimistic); v1 adds real messages with consent. Full method and limits: docs/TESTING_REPORT.md. Hindi voices and the optional language model are licensed for non-commercial use.
