

Field morning: run sheet

Full protocol: docs/field/FIELD_TEST_PROTOCOL.md. No names, phone numbers or photos of people are written anywhere.

Before people arrive

1. Node on, console PIN set, impact counters reset (console, Counters), firewall script run, node page shows 0 outbound connections.
2. Two of your own phones: open the app once from the node's HTTPS address or the stand-alone site, so task 4 works.
3. Pick 6 message cards from the jury kit: 4 scams of different kinds and 2 genuine (table below). Each person gets 3, shuffled, at least one genuine.
4. Number the recording cards P01, P02, ... before you start.

Roles

- **Host** (the operator): welcomes people, runs the assisted checks on the console.
- **Facilitator**: reads the consent, gives the tasks, never helps unless asked (and then ticks "helped").
- **Recorder**: fills one recording card per person, times each task.

With each person (15–20 minutes)

1. Consent (next page), read aloud. Stop if they say no.
2. About them: tick the boxes on their card.
3. Task 1, three message cards: first their own judgement (real / fraud / unsure), then Sahayak, then "what will you do now?"
4. Task 2a, a phone call they describe. Task 2b, their own worrying message, only with the second consent.
5. Task 3, "What am I owed?": they answer the questions themselves.
6. Task 4, a few people: Wi-Fi and mobile data off on your phone, check one card.
7. Three questions, 1 (not at all) to 5 (completely).

Message cards and the right answers

Card	Message	Right answer
M1	"KYC expired" SMS	scam
M2	Caller wants my OTP	scam
M3	"Scan to get cashback"	scam
M4	"Digital arrest" call	scam
M5	"PM-Kisan new list" app	scam
M6	"Pay ₹500 for your Ayushman card"	scam
M7	Electricity cut tonight	scam
M8	A real bank OTP	genuine
M9	Try to fool it: leetspeak	scam
M10	Try to fool it: advisory wrapped	scam
M11	Try to fool it: otp synonym	scam
M12	A genuine message with an OTP	genuine

After the day

1. Type the cards into bench/field/field_participants_v0.csv and field_tasks_v0.csv (one row per attempt; "truth" from the table above).
2. `python bench/eval_field.py --report --place "CSC name, village" --date YYYY-MM-DD`
3. Rebuild the deck (node docs/deck/build_deck_v3.js) and the testing report: the field results appear on their own.

Read aloud before anything else · पहले यह पढ़कर सुनाएँ

Read it in the person's language. Tick the boxes on the participants sheet only for what they agree to. If they say no to the first question, thank them and stop. (Hindi to be checked by a native speaker before use.)

हिंदी

नमस्ते। हम "सहायक" नाम का एक ऐप जाँच रहे हैं, जो बताता है कि कोई मैसेज या कॉल ठगी तो नहीं, और कौन-सी सरकारी योजनाएँ आपको मिल सकती हैं। आज हम ऐप को जाँच रहे हैं, आपको नहीं।

- इसमें 15–20 मिनट लगेंगे। आप कभी भी रुक सकते हैं, कोई कारण बताने की ज़रूरत नहीं।
- हम आपका नाम, फ़ोन नंबर या फ़ोटो नहीं लिखेंगे। सिर्फ़ उम्र का अंदाज़ा और आपके जवाब लिखेंगे।
- कोई पैसा, OTP, PIN या बैंक खाता इस्तेमाल नहीं होगा। अगर कोई कभी OTP माँगे, तो वह हम नहीं हैं।
- योजनाओं के जवाब सिर्फ़ जानकारी हैं; आखिरी फ़ैसला दफ़्तर का होता है।
- क्या आप आज हिस्सा लेना चाहेंगे? (हाँ / नहीं)
- अगर आपके फ़ोन पर कोई ऐसा मैसेज आया है जिस पर आपको शक है, तो क्या आप उसे हमें दिखाना चाहेंगे? हम उसमें से नाम, नंबर और खाते की जानकारी हटाकर सिर्फ़ ऐप को बेहतर बनाने के लिए रखेंगे। (हाँ / नहीं; "नहीं" कहने से कोई फ़र्क नहीं पड़ता)

English

Namaste. We are testing an app called Sahayak, which tells you whether a message or call is a fraud and which government schemes you may be able to get. Today we are testing the app, not you.

- It takes 15–20 minutes. You can stop at any time without giving a reason.
- We will not write down your name, phone number or take your photo. We note only your age range and your answers.
- No money, OTP, PIN or bank account is used. If anyone ever asks you for an OTP, it is not us.
- The scheme answers are guidance only; the office makes the decision.
- Would you like to take part today? (yes / no)
- If you have a message on your phone that worried you, would you like to show it to us? We will remove names, numbers and account details and keep it only to make the app better. (yes / no; saying no changes nothing)
